

A communication of profound love from the bees

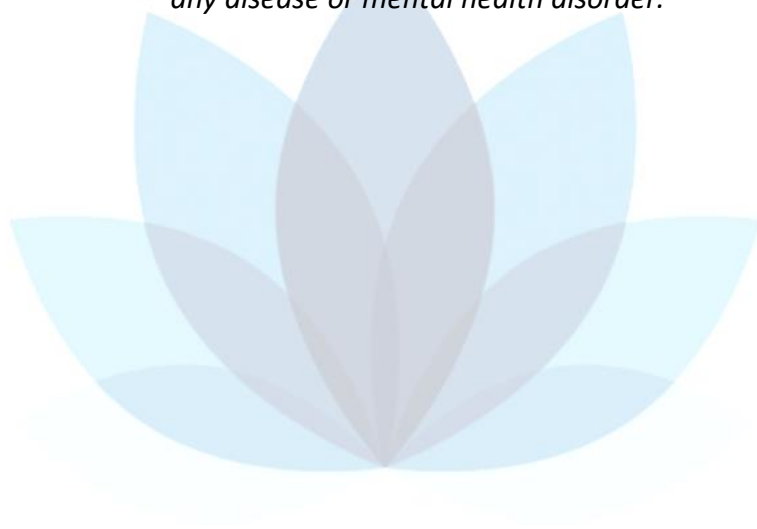

as channeled from the Beings of Light through Liesel

“We come to you now from a part of Us that is the loving intelligence that oversees the bees of your world. Some call this loving intelligence the Deva of Bees. We so dearly hope that you, humans, find your way to your own version of hive mindedness, to the realization of your connectedness and interdependence with all. Your expansion into the fullness of this awareness is imperative for all of us who have our home on the Earth with you. We have surrendered and entrusted our fate at the physical level to you, please hold it gently and lovingly.

You are indeed a unique species. Because of your ability to think in complex ways, you also face a unique challenge, for the mental structures that develop in you can often block your awareness of your natural connection to all. You forget the true intelligence that is within you, and mistakenly believe that the intelligence of the mind is the truth. You have been chosen to make a great leap in evolution. You, who are reading this now are those who will show the way, those who are beginning to allow this true intelligence of the Universe to fully arise within. This true intelligence can then flow into the mind and generate thoughts and ideas that are in harmony with the well being of all on the planet. When, as a species, the majority of humans are in the state of allowing this transformation within themselves, there will be the dawn of a new age of love and harmonious living on Earth. This is the Ascension. We send you our deepest love and encouragement for your transformation. When you next see a bee visiting a flower, or hear our familiar buzz, remember what we have said and let it serve as a call to awareness to open further to the Oneness of All.”

“Always know Our love is truly with you, because Our love truly is you.”
