

Climate Change

as channeled from the Beings of Light through Liesel

“Climate change is the manifestation of the collective karma of humanity’s relationship with Mother Earth. However, it is important to remember that the fulfillment of karma is only necessary when the perspective of separation remains (please see Our channeling entitled “Karma” for more on the dynamics of karma.) When collective humanity has meaningfully awakened and no longer views Mother Earth as something to be used that is separate from humanity, there will no longer be the need for climate devolvement. When a critical mass of vibration is reached, climate solutions that are currently opaque while humanity remains within the spectrum of vibration that created the problem, will suddenly become apparent. This is because humanity will have risen to the vibrational spectrum that honors Mother Earth and her many inhabitants as an inextricable part of itself. It is the sustained broadcasting of this vibrational frequency by collective humanity that will be the key that unlocks and makes apparent the solutions to the current climate crisis.”

“Always know Our love is truly with you, because Our love truly is you.”
